

Technical Committee Descriptions

Cosmetics Alliance Canada member companies are invited to participate in our committees to provide the association with insight and direction with respect to industry issues and members' interests. Participation also provides members with access to targeted information in their area of interest and is a significant benefit of membership.

Technical Committee Mandate

The principal goals of CCTFA's Technical Committees are to generate solutions, gather intelligence, coordinate strategies, and develop CCTFA positions regarding personal care product regulatory issues management.

Product Compliance & Market Access Committee

Reviews and provides direction on issues related to product regulations, licensing, and compliance.

Facility Compliance & Manufacturing Committee

Reviews and provides direction on issues related to establishment and site licensing, manufacturing practices, and quality control.

Risk Assessment & ingredient Safety Committee

Reviews and provides direction on issues related to specific ingredients, general ingredient defense, science and risk-assessment.

International Committee

Provides feedback and direction on international issues and developments such as those relating to the International Cooperation on Cosmetic Regulation (ICCR), International Association Collaboration (IAC), and emerging global environmental and safety issues.
