## Information Letter 1214

**Subject: Toxicological Deep Dives to Geraniol**

**Related ILs: 1204**

Dear Colleagues,

We are writing to provide you with an update on the current regulatory situation regarding Geraniol (CAS number 106-24-1). IFRA and BASF SE as Lead Registrant are closely monitoring the regulatory developments to successfully defend the continued use of geraniol in all applications. BASF SE is generating additional toxicological data to ensure the most robust dataset to justify continued use and remains in close contact with authorities and relevant stakeholders.

We are pleased to share that BASF SE will present the latest regulatory developments on geraniol at two upcoming conferences:

1. **Eurotox Congress**: September 14th - 17th, Athens, Greece
2. **16th International Akademie Fresenius Conference "Endocrine Disruptors"**: November 25th - 26th, Düsseldorf, Germany

IFRA encourages all experts interested in the ongoing toxicological assessment of geraniol to attend these conferences. This will be an excellent opportunity to engage directly with BASF SE's Senior Toxicological Expert, Dr. Markus Wahl, and gain deeper insights into our findings.

For those unable to attend the conferences but still wishing to obtain a comprehensive overview of geraniol's regulatory situation, please get in touch with us (see contact details below). We will provide all the necessary information and support.

**CONTACT:** If you have any further questions, please contact, **Cristina Arregui** ([carregui@ifrafragrance.org](mailto:carregui@ifrafragrance.org)) at IFRA.

Best regards,

IFRA
